LAGOS, NIGERIA · REMOTE · ALL TIME ZONES

OPEN TO FULL-TIME & CONTRACT ROLES

01 SUMMARY

I spent three years running communities, launches and partnerships for **38 Web3 projects** across Ethereum, Solana, Base, Avalanche, Sui, BNB Chain and Bitcoin. Since September 2026 I have also been shipping full-stack products with **Claude Code** and Codex: **six live products in six weeks**, most of them built for international hackathons. I explain technical products in plain words, run the operations around them, and build tools that prove what they claim.

02 EXPERIENCE

Independent Product Builder · Remote

Sep 2026 – Present

- Shipped six public products (TypeScript, Python, Solidity) most of them for hackathons run by GitLab, Stripe × CreateOS, Portaldot, OpenServ and GenAI.Works.
- Work with Claude Code and Codex as pair programmers. I write the spec, split it into tasks an agent can finish, review every diff, and only ship once it has tests and evidence behind it.
- Built Bytematch, which made 118 of 242 contracts on the Portaldot V3 testnet checkable against their source. It also ran all 74 hackathon repositories through the checker.
- Built a blind benchmark for LastCopy: 1,980 of 1,980 field tablets were decided correctly, with none wrongly cleared for wiping.

Web3 Community, Growth & Operations Lead · Freelance, remote

2022 – 2025

- Led community, growth and launch operations for 38 projects, including Edwin Finance (2025), Marvin on Base, Gangs of the Meta, Sol Hive and ZERA.
- Ran Discord, Telegram and X communities with thousands of members worldwide: moderation standards, bot tooling, escalation paths and conflict resolution.
- Built engagement programmes (contests, AMAs, giveaways, community calls) that kept members active between launches and drove retention.
- Worked with founders and engineers on token launches, NFT mints and product releases. Wrote the announcements, guides, onboarding docs and FAQs.
- Handled business development and partnership outreach. Tracked growth and on-chain activity with Dune, Nansen, X Insights and Telegram analytics.

03 HOW I WORK WITH CLAUDE

I use Claude Code daily as an engineering partner, not as autocomplete. I plan in writing first (specs, AGENTS.md and CLAUDE.md files), give the agent bounded tasks, keep humans in the loop for anything that touches money or personal data, and judge the output by tests, benchmarks and live checks. That process took me from community operations to shipping production-style products in TypeScript, Python and Solidity.

PROOF ATTACHED

04 SELECTED PRODUCTS

Bytematch

Nov 2026
TypeScript · Solidity
Hono · MCP

Source verification for Portaldot, a chain with no Etherscan. It compiles the source, matches the deployed bytecode byte for byte, and records the results on chain for about 0.01 POT per contract. Foundry and Hardhat verify against it unchanged.

bytematch-portaldot.vercel.app

LastCopy

Oct 2026 · Open Agent
Python · Agents
Nemotron · Zetaris

Tells survey teams whether a field tablet is **safe to wipe** by checking every record and photo against the server, and issues a hashed certificate anyone can re-check.

lastcopy-five.vercel.app

Blotter

Oct 2026 · GitLab
Python · FastAPI
GitLab Duo · Semgrep

Finds personal data and keys leaking into production logs, switches the leaking line off, and has agents fix the code and learn a rule. It reports whose data leaked and which legal deadlines apply, without showing a single value.

blotter-prod.onrender.com

Fastforward

Oct 2026 · Stripe × CreateOS
TypeScript · Python

Fast-forwards Stripe test billing clocks to find subscription-access bugs, repairs the handler, and checks the fix against fresh customers and signed webhooks.

Pactset

Oct 2026 · Stellar
Next.js · Supabase
Rust (Soroban)

Event coordination for organisers, suppliers and crew: versioned agreements, proof of work, and milestone payments held in escrow on Stellar.

pactset.vercel.app

Choiceproof

Sep 2026 · OpenServ
Next.js · PostgreSQL

Regression tests for AI decisions. It records the exact inputs and answers, has a person label any changed answer, and reruns saved cases against each new revision.

choiceproof.vercel.app

05 SKILLS

COMMUNITY	Community growth and retention · Discord and Telegram administration · Moderation systems and bots · AMAs and events · Crisis communication
GROWTH & BD	Partnerships and outreach · Launch coordination · Campaign planning · Content strategy (threads, articles, short video)
BUILD	TypeScript · Next.js · React · Python · FastAPI · PostgreSQL · REST APIs · CI/CD · Vercel · Render
AI	Claude Code · Codex · Multi-agent pipelines · Evaluation loops · MCP servers · Human-in-the-loop review
CHAIN	Solidity · Smart contract security basics · Wallets and payments · On-chain research (Dune, Nansen)
WRITING	Technical writing · Documentation · Onboarding guides · Explaining complex products to new users

06 EDUCATION

B.A. International Relations
Olabisi Onabanjo University, Nigeria · 2021 — 2025

07 CERTIFICATIONS

Blockchain Fundamentals · Cyfrin Updraft · 2025

Solidity Smart Contract Development · Cyfrin Updraft · 2025

CompTIA Network+ · 2025

Python Programming · Penyl School of Coding · 2025

08 WEB3 PROJECTS (2022 – 2025)

$BEERS on Avax 2025
420 Buddies Labs 2024
Alienhood 2024
Apex.ai 2024
Apple Head 2023
BSC INU 2024
BTC Kitty Cats 2024
Byke Anchor 2024
